Wi-Fi camera outdoor, HD 1080p, motion detection, snapshot, recording, 2-way talk, night vision, IP65

This smart and splashproof outdoor Wi-Fi camera enables you to keep an eye on the immediate vicinity of your home from a distance, using your smartphone or tablet. All you need is this camera, the Smart me app and a stable Wi-Fi network. The camera sends notifications via the app when movements are detected. The images can be stored on your smartphone or on an SD card (not included). In the Smart me app, you can also link this camera to a Smart me Wi-Fi light bulb (make a scenario). If the camera then detects a movement, the light bulb will switch on automatically. It is possible to use the Smart me app on your phone/tablet to communicate with the person detected by the camera. Connecting this outdoor camera is particularly easy because there is no need to connect any network cables. The camera only needs to be powered using the supplied power cable.

- Plug & play: no gateway or software required.
- Use this camera to activate other Smart me products when detecting movements.
- Receive notifications via the Smart me app.
- Built in speaker and microphone for 2-way communication.
- Create pictures or live videos and store them on your mobile device.
- Videos can be recorded on a SD card (not included).
- Infrared night vision of 15 metres.
- Splashproof.
- Watch what happens outdoors from anywhere with the Smart me app.
