ITSKINS SAVEBUDS smartphone charger and backup cable. Micro-USB

Requires a Micro-SD card which is not included

SAVEBUDS is a smartphone charging cable that automatically backs up important data from your Android phone to a Micro-SD card in your SAVEBUDS-cabel every time you connect it.

- Your personal and business data gets backed up every time you charge your mobile
- SAVEBUDS and SAVEBUDS APP gives you full visibility and control over the phone's internal data and external memory (from the phone's SD card)
- SAVEBUDS only saves new data and changes which means additional backups will be significantly faster
- Keep your files stored locally on your Micro-SD card
- Your storage can be as large as your Micro-SD card allows
- Everything is stored locally and is not dependent on internet connections
